## projects

2015 **civicBOT** <http://civicbot.hubcivico.org>  
civicBOT is a tool for monitoring the performance of political parties. It is a Telegram bot that receives information in text or image format and let's citizens classify this information. After that, all the information is analyzed.

2015 **amigaBOT** <https://github.com/algope/amigaBOT>  
amigaBOT integrates Google Maps, as well as notifications via email, SMS, push and alerts for the authorities in order to allow victims of domestic violence report a risk by simply sending a message to our BOT based in Telegram.

2016 **openCityCouncils** <https://opencitycouncils.org>  
openCityCouncils is a set of simple, technology-neutral, machine-readable descriptions of council documents that makes the structural and semantic

components of digital council documents accessible, supporting the creation of high-value parliamentary and legislative information services that greatly improve efficiency and accountability of the City Councils.

## volunteering

Sep12 – Jul14 **Mentor for exchange students** Polytechnic University of Valencia  
*Helping exchange students with their arrival to Spain and during their stay at the University so it became easy for them to find accommodation, to know the campus and the city, select the most interesting courses to take, meet new people and, in general, with everything they needed.*

Feb12 – Feb13 **University Relations Coordinator** Polytechnic University of Valencia  
*As a Coordinator of the University Relations Area I helped Students to understand University Regulations and Normative, also to solve issues between Students and University Board.*
